To Whom It May Concern:

We are contacting you in regards to the Massachusetts Ave Gas Main Replacement project that is ongoing in your area. We are working to finish our gas installation on Massachusetts Ave, which will require us to work at night.

Between the dates of November 1, 2020 through December 1, 2020, construction work will take place at night between the hours of 9:00 pm through 5:00 am, as authorized by the Montgomery County Department of Environmental Protection, and Maryland SHA in accordance with the SHA permit for night work. We will make every effort to limit the amount of work we have to do at night, and reduce the amount of noise we generate. Our daytime construction work will continue during these dates between the hours of 9:00am and 5:00pm, unaffected by our night work. We hope our work will go according to our schedule, which should have us finishing our night work before December 1st.

Our night work will include the following:

Excavation and replacing of the existing Gas service on Massachusetts Ave at the intersection with Sangamore Rd, and installation of the new Gas main. (Noise generating activities include saws, compressors, generators, back-up alarms, jackhammers, hammer drills, and miscellaneous construction vehicles).

If you have questions or concerns, please contact Donald Weller, Construction Crew supervisor for NPL Construction at (571) 364-2048 or Jeffery Sirk, Washington Gas Supervisor at (571) 422-5259.
